Semester Courses

Recommendations for Your Course of Study

At the Lukeion Project we cater to a child's interests and ability, not his grade level or age *per se*. Most of our semester courses are designed for those working at the high school level. Some learners are ready at 12 to work at *the high school level* while others should certainly wait until they are 15 or 16. Workshops are the perfect entry point for any of our subjects and are great for age 10 through adult in many cases.

Language at The Lukeion Project

Every year Lukeion student make impressive honors scores on national Latin and Greek exams. We ask a lot from our students. In return, they truly master Latin & Greek! By third year, our language students confidently translate satisfying chunks of real passages. All of our language classes are taught at the high school level. Students should be ready to study every day and turn in weekly translations and quizzes. Start your student when he or she is ready for the challenge. Preparatory courses **Witty Wordsmith & Barbarian Diagrammarians** provide the ideal groundwork for students starting Latin 1 or Greek 1 the following year.

An emphasis on Research Writing at The Lukeion Project

A core skill for college success is the ability to employ critical thinking and analysis in research writing. This skill is best developed incrementally throughout a student's secondary education. We recommend students start with our **Muse Literature Survey** courses which prompt students to write analytically in a variety of instructor graded assignments. **Myth lit.** and our **Classical History** courses take students through all the steps to write a successful research paper. Once students have written a few of research papers, they are ready for our spring **Advanced Research Writing** semester course during their final years of high school.

"After two weeks of college classes, I can say with confidence that your class prepared me better than any of my other classes for college workloads and thinking styles. When your AP kids complain about the amount of writing that they have to do, tell the young whippersnappers about their predecessor who is enjoying her college classes much more than her peers because of it." Amanda R., Lukeion veteran

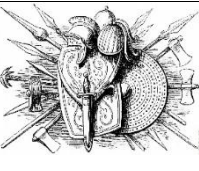

"I've been meaning to write ... to let you know that [my daughter], as an 8th grader, took the ACT and scored in the 99% for her verbal component. This is directly attributable to her having participated in Amy's rigorous Latin class and Regan's Barbarian Diagrammarians. I so appreciate your wonderful courses and the academic challenge that you offer in such a very humorous but educational format. The cost for your course, when weighed against the scholarship offers that have flooded in since her results, is more than compensated. The return on investment is astronomical." ~Lynn L.

"I'm the parent of a child in your Latin Ia class I have to write and say thank you because [my son] is enjoying the class so much. When he pushed away from the computer after the first class, he said, "Wow, that was really FUN." As if he'd just opened a bottle of medicine and found a Skittle. [My son] has hyperlexia with audio processing issues. He has great difficulty listening to things like podcasts, audiobooks, and for a long while as a little kid he watched movies with the subtitles turned on -- in English. I didn't think it would be possible for him to succeed in a class where there was a live audio component, but friends encouraged me to try Lukeion. I'm so glad I did! The visuals you display -- words and pictures -- really help him. And he is loving the class. THANK YOU! You are doing a great job." ~Lydia N.

"I just wanted to...let you know how grateful I am for Lukeion and how much it has helped me in Latin, and in life. I grew up in a homeschool program which values learning Latin, but unfortunately not many instructors in the program understand the language at all. I have found myself called upon to teach and tutor frequently, and currently spend every Thursday morning teaching Latin 1 to middle schoolers. I am certain I am only able to do this because of the amazing instruction that Lukeion has given me. ...I highly recommend your program to all the students I tutor and teach, because it is the reason I have all these opportunities. Thank you, thank you, thank you for everything you have done for me as my teacher. I really appreciate it. As well as a great understanding of the language, it has taught me a good work ethic, and the fact that having a methodical approach to anything will always succeed. Thanks again, and I'm looking forward to a great last semester." M.P., Latin 3b

Educational Travel with The Lukeion Project

For many, travel is an unobtainable luxury, the stuff of dreams for the future. With planning and saving, many are able to take that “frivolous” trip of a lifetime but well after the kids have grown and gone. Planning ahead and getting the whole family involved is key. See the most amazing ruins of the ancient Greeks and Romans as a family forming precious and life changing memories. There are the added perks: international travel can light a fire in your child’s imagination, prompt her to study a foreign

language, and give him that boost on his college applications because colleges know how world travel will change a person for the better.

All of our trips are custom tours, hand-crafted by Classical archaeologists Regan and Amy Barr who have chosen sites based on years of travel experience alone and with groups. Expect to see not only the most famous sites from the Classical world, but many places off the beaten track. The results? You’ll enjoy a once-in-a-

lifetime opportunity to see the wonders of the ancient world while sampling the Mediterranean lifestyle, culture, hospitality and food.

BONUS: Know Before You Go Sessions

There are many tour companies that will take you to the Mediterranean. Few will make education a priority. Only the Lukeion Project invites travelers to enjoy the history, art, and culture of the Classical world as a family and then enriches their experience with included online educational events covering everything you need to know about our upcoming trip. We are host to all ages and interests from 8 to 88. Travelers need not be enrolled in our courses to go.

Final deadline for our Golden Age of the Roman Empire tour of Italy is January 31
